Nama : Intan Muliawati Rayhana
NIM : 242410101013
Kelas : A
Tugas Mata Kuliah : Pemrograman Website

Tugas Aktivitas Mandiri 1

Menjalankan Laragon (Start All)

1. Cek PHP tersedia dengan php --version

2. Cek Composer tersedia dengan composer --version

```
C:\Users\Intan MR>composer --version
Composer version 2.9.4 2026-01-22 14:08:50
PHP version 8.3.30 (C:\laragon\bin\php\php-8.3.30-Win32-vs16-x64\p
hp.exe)
Run the "diagnose" command to get more detailed diagnostics output
.
```

3. Membuat project laravel baru dengan composer create-project laravel/laravel siak-app

```
C:\Users\Intan MR>cd C:\laragon\www

C:\laragon\www>composer create-project laravel/laravel siak-app
Creating a "laravel/laravel" project at "./siak-app"
Installing laravel/laravel (v13.3.0)
  - Installing laravel/laravel (v13.3.0): Extracting archive
Created project in C:\laragon\www\siak-app
> @php -r "file_exists('.env') || copy('.env.example', '.env');"
Loading composer repositories with package information
Updating dependencies
Lock file operations: 107 installs, 0 updates, 0 removals
  - Locking brick/math (0.14.8)
  - Locking carbonphp/carbon-doctrine-types (3.2.0)
  - Locking dflydev/dot-access-data (v3.0.3)
```

4. Membuat database baru siak_db di phpMyAdmin

5. Konfigurasi file .env

6. Menjalankan php artisan key:generate

```
C:\laragon\www\siak-app>php artisan key:generate

  INFO  Application key set successfully.
```

7. Menjalankan server php artisan serve dan membuka http://127.0.0.1:8000 di browser

```
C:\laragon\www\siak-app>php artisan serve

  INFO  Server running on [http://127.0.0.1:8000].

  Press Ctrl+C to stop the server

  2026-04-27 14:30:57 / ..................................... ~ 1s
  2026-04-27 14:30:57 /favicon.ico ........................ ~ 1s
```

8. Eksplorasi setiap struktur folder

9. Menjalankan php artisan route:list

```
C:\laragon\www\siak-app>php artisan route:list

  GET|HEAD  / ..................................... routes/web.php:5
  GET|HEAD  storage/{path} storage.local › vendor/laravel/frame…
  PUT       storage/{path} storage.local.upload › vendor/larave…
  GET|HEAD  up vendor/laravel/framework/src/Illuminate/Foundati…

                                                  Showing [4] routes
```

Route yang sudah terdaftar setelah menjalankan perintah php artisan route:list antara lain route bawaan laravel yaitu :

a. Route /

   Route ini menggunakan method GET/HEAD dan berfungsi untuk menampilkan halaman awal Laravel. Ketika pengguna mengakses alamat http://127.0.0.1:8000, Laravel akan menampilkan file welcome.blade.php.

b. Route storage/{path}

   Route ini digunakan untuk mengakses file yang terdapat di dalam folder storage, digunakan untuk upload file atau menampilkan file seperti gambar. Route ini menggunakan method GET/HEAD dan PUT.

c. Route /up

   Route ini berfungsi untuk mengecek apakah aplikasi Laravel berjalan dengan baik. Route ini biasanya digunakan oleh sistem atau server, bukan untuk diakses langsung oleh pengguna.

Tugas Aktivitas Mandiri 2

1. Membuat Controller Dashboard Controller dengan php artisan make:controller DashboardController

```
C:\laragon\www\siak-app>php artisan make:controller DashboardContr
oller

  INFO  Controller [C:\laragon\www\siak-app\app\Http\Controllers\
DashboardController.php] created successfully.
```

2. Menambahkan method index() yang mengembalikan view('dashboard')

DashboardController.php | web.php | dashboard.blade.p

app > Http > Controllers > DashboardController.php

```php
<?php

namespace App\Http\Controllers;

use Illuminate\Http\Request;

class DashboardController extends Controller
{
    public function index()
    {
        return view('dashboard');
    }
}
```

3. Daftarkan route di routes/web.php Route::get('/dashboard', [DashboardController:: class, 'index']) -> name('dashboard');

.env | DashboardController.php | web.php

routes > web.php

```php
<?php

use Illuminate\Support\Facades\Route;
use App\Http\Controllers\DashboardController;

Route::get('/', function () {
    return view('welcome');
});

Route::get('/dashboard', [DashboardController::class, 'index'])->name('dashboard');
```

4. Membuat file view sementara resources/view/dashboard.blade.php yang berisi <h1>Dashboard SIAK</h1>

web.php | input-produk.blade.php | tentang.blade.php | manajemen-produk.blade

resources > views > dashboard.blade.php

```blade
<h1>Dashboard SIAK</h1>

<ul>
    <li><a href="{{ route('input.produk') }}">Input Produk</a></li>
    <li><a href="{{ route('manajemen.produk') }}">Manajemen Produk</a></li>
    <li><a href="{{ route('data.pesanan') }}">Data Pesanan</a></li>
</ul>
```

5. Mengakses http://127.0.0.1:8000 di browser

6. Membuat route /tentang dengan Route::view('/tentang', 'tentang'); dan membuat view-nya

7. Menjalankan php artisan route:list

```
C:\laragon\www\siak-app>php artisan route:list

  GET|HEAD  / ..................................... routes/web.php:6
  GET|HEAD  dashboard .... dashboard › DashboardController@index
  GET|HEAD  storage/{path} storage.local › vendor/laravel/frame…
  PUT       storage/{path} storage.local.upload › vendor/larave…
  GET|HEAD  tentang ...............................................
  GET|HEAD  up vendor/laravel/framework/src/Illuminate/Foundati…

                                                  Showing [6] routes
```

8. Membuat Route::get('/hitung/{a}/{b}', fn($a, $b) => $a + $b) dan akses /hitung/10/25

DashboardController.php | web.php | tentang.blade.php

routes > web.php

```php
<?php

use Illuminate\Support\Facades\Route;
use App\Http\Controllers\DashboardController;

Route::get('/', function () {
    return view('welcome');
});

Route::get('/dashboard', [DashboardController::class, 'ind

Route::view('/tentang', 'tentang');

Route::get('/hitung/{a}/{b}', function ($a, $b) {
    return $a + $b;
});
```

localhost / localhost / siak_db | ph | 127.0.0.1:8000/hitung/10/25

127.0.0.1:8000/hitung/10/25 Summarize Chat
