Implementasi Proyek Mitra Flora

Aktivitas Mandiri 5

1. Buat Resource Controller: `php artisan make:controller Mahasiswa Controller --resource --model-Mahasiswa`

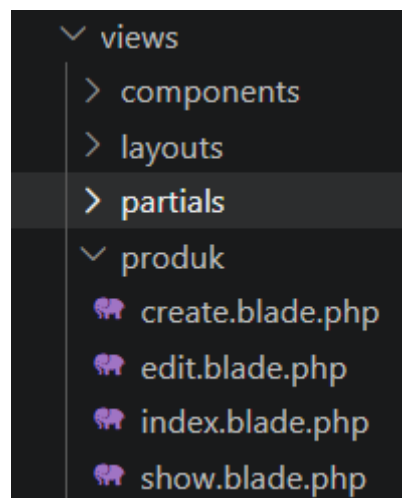

```
C:\laragon\www\siak-app>php artisan make:controller ProductController --resource --model=Product
INFO Controller [C:\laragon\www\siak-app\app\Http\Controllers\ProductController.php] created successfully.
```

2. Daftarkan di routes/web.php: `Route::resource('mahasiswa', MahasiswaController::class)`

```
use App\Http\Controllers\ProductController;

Route::resource('produk', ProductController::class);
```

3. Buat semua view: mahasiswa/index.blade.php (tabel + pagination), create.blade.php (form), edit.blade.php (form pre-filled), show.blade.php (detail)

4. Implementasi method index() ambil semua mahasiswa dengan paginate (10) dan tampilkan ke view

```
class ProductController extends Controller
{
    public function index()
    {
        $products = Product::latest()->paginate(10);

        return view('produk.index', compact('products'));
    }
}
```

5. Implementasi create() dan store() - dengan validasi nim (unique), nama (min:3), email (emaillunique), jurusan (in:SI, TI,MI)

- Implementasi create()

```
public function create()
{
    return view('produk.create');
}
```

- Implementasi store()

```
public function create()
{
    return view('produk.create');
}

public function store(Request $request)
{
    $validated = $request->validate([
        'kode_barang' => [
            'required',
            'min:3',
            'unique:produks,kode_barang'
        ],
        'nama_produk' => [
            'required',
            'min:3'
        ],
        'kategori' => [
            'required',
            Rule::in(['Tanaman Indoor', 'Tanaman Outdoor'])
        ],
        'harga' => [
            'required',
            'numeric',
            'min:1'
        ],
        'stok' => [
            'required',
            'integer',
            'min:0'
        ],
        'tanggal_masuk' => [
            'required',
            'date'
        ],
    ],
```

```

    ],
    'tanggal_masuk' => [
        'required',
        'date'
    ],
    'gambar' => [
        'nullable',
        'image',
        'mimes:jpg,jpeg,png,webp',
        'max:2048'
    ],
    ],
]);

$validated['aktif'] = true;

if ($request->hasFile('gambar')) {
    $namaGambar = time() . '.' . $request->gambar->extension();
    $request->gambar->move(public_path('img'), $namaGambar);
    $validated['gambar'] = $namaGambar;
}

Product::create($validated);

return redirect()
    ->route('produk.index')
    ->with('success', 'Produk berhasil ditambahkan.');
```

6. Implementasi edit() dan update() - tampilkan form dengan old() atau \$mahasiswa->field, validasi unique kecuali ID ini

- Implementasi edit()

```

public function edit(Product $produk)
{
    return view('produk.edit', compact('produk'));
}
```

- Implementasi update()

```

public function update(Request $request, Product $produk)
{
    $validated = $request->validate([
        'kode_barang' => [
            'required',
            'min:3',
            Rule::unique('produk', 'kode_barang')->ignore($produk->id),
        ],
        'nama_produk' => [
            'required',
            'min:3'
        ],
        'kategori' => [
            'required',
            Rule::in(['Tanaman Indoor', 'Tanaman Outdoor'])
        ],
        'harga' => [
            'required',
            'numeric',
            'min:1'
        ],
        'stok' => [
            'required',
            'integer',
            'min:0'
        ],
        'tanggal_masuk' => [
            'required',
            'date'
        ],
        'gambar' => [
            'nullable',
            'image',
            'mimes:jpg,jpeg,png,webp',
            'max:2048'
        ],
    ],
```

```

if ($request->hasFile('gambar')) {
    if ($produk->gambar && File::exists(public_path('img/' . $produk->gambar))) {
        File::delete(public_path('img/' . $produk->gambar));
    }

    $namaGambar = time() . '.' . $request->gambar->extension();
    $request->gambar->move(public_path('img'), $namaGambar);
    $validated['gambar'] = $namaGambar;
}

$produk->update($validated);

return redirect()
    ->route('produk.index')
    ->with('success', 'Produk berhasil diperbarui.');
```

7. Implementasi destroy() - dengan konfirmasi JavaScript sebelum hapus

- Implementasi destroy()

```

public function destroy(Product $produk)
{
    if ($produk->gambar && File::exists(public_path('img/' . $produk->gambar))) {
        File::delete(public_path('img/' . $produk->gambar));
    }

    $produk->delete();

    return redirect()
        ->route('produk.index')
        ->with('success', 'Produk berhasil dihapus.');
```

- Konfirmasi JavaScript sebelum hapus

```

<form action="{{ route('produk.destroy', $product) }}"
    method="POST"
    style="display:inline-block;"
    onsubmit="return confirm('Yakin ingin menghapus produk ini?')">
    @csrf
    @method('DELETE')
    <button type="submit" class="btn-hapus">Hapus</button>
</form>
```

8. Tambahkan flash message di layout dan tampilkan session('success') /session('error')

```

@if(session('success'))
    <div class="alert-success">
        {{ session('success') }}
    </div>
@endif
@if(session('success'))
    <div class="alert-success">
        {{ session('success') }}
    </div>
@endif
@if(session('error'))
    <div class="alert-error">
        {{ session('error') }}
    </div>
@endif
```

9. BONUS: Tambahkan fitur upload foto profil dengan validasi image/mimes:jpg,png|max:2048

```
'gambar' => [
    'nullable',
    'image',
    'mimes:jpg,jpeg,png,webp',
    'max:2048'
],
]);

if ($request->hasFile('gambar')) {
    if ($produk->gambar && File::exists(public_path('img/' . $produk->gambar))) {
        File::delete(public_path('img/' . $produk->gambar));
    }

    $namaGambar = time() . '.' . $request->gambar->extension();
    $request->gambar->move(public_path('img'), $namaGambar);
    $validated['gambar'] = $namaGambar;
}
```

Aktivitas Mandiri 6

1. Instal Laravel Breeze: composer require laravel/breeze --dev, kemudian php artisan breeze:install blade

- Instal Laravel Breeze: composer require laravel/breeze

5. Amankan semua route mahasiswa dengan middleware auth:

`Route::middleware('auth')->resource('mahasiswa', MahasiswaController::class)`

```
use App\Http\Controllers\ProductController;  
  
Route::middleware('auth')->resource('produk', ProductController::class);
```

6. Coba akses /mahasiswa tanpa login - pastikan diredirect ke halaman login

- saat mengakses produk langsung diarahkan ke login terlebih dahulu karena untuk mengakses produk harus login dulu

- setelah login baru dapat mengakses produk

Gambar	Kode Barang	Nama Produk	Kategori	Harga	Stok	Tanggal Masuk	Status	Aksi
	MF-001	Anggrek Bulan	Tanaman Indoor	Rp 150.000	8	2026-01-10	Tersedia	Detail Edit Hapus
	MF-002	Kaktus	Tanaman Outdoor	Rp 50.000	3	2026-02-05	Hampir Habis	Detail Edit Hapus
	MF-003	Marigold	Tanaman Outdoor	Rp 50.000	3	2026-02-10	Hampir Habis	Detail Edit Hapus
	MF-004	Aglonema	Tanaman Indoor	Rp 80.000	20	2026-03-01	Tersedia	Detail Edit Hapus
	MF-005	Lidah Mertua	Tanaman Indoor	Rp 90.000	6	2026-03-15	Tersedia	Detail Edit Hapus

7. Tambahkan nama user di navbar: `{{ auth()->user()->name }}`

```
<nav class="menu">
  @auth
    <a href="#">
      |  {{ auth()->user()->name }}
    </a>

    <form method="POST" action="{{ route('logout') }}">
      @csrf
      <button type="submit" class="btn-logout">
        | Logout
      </button>
    </form>
  @endauth

  @guest
    <a href="{{ route('login') }}"><img alt="login icon"/> Login</a>
    <a href="{{ route('register') }}"><img alt="register icon"/> Register</a>
  @endguest
</nav>
```

8. Buat custom middleware CekAdmin yang hanya mengizinkan user dengan role 'admin' mengakses route tertentu

- Membuat kolom role di tabel users

```
C:\laragon\www\siak-app>php artisan make:migration add_role_to_users_table
```

INFO Migration [C:\laragon\www\siak-app\database\migrations\2026_05_12_190948_add_role_to_users_table.php] created successfully.

```
return new class extends Migration
{
    public function up(): void
    {
        Schema::table('users', function (Blueprint $table) {
            $table->string('role')->default('customer')->after('email');
        });
    }

    public function down(): void
    {
        Schema::table('users', function (Blueprint $table) {
            $table->dropColumn('role');
        });
    }
};
```

```
C:\laragon\www\siak-app>php artisan migrate
```

INFO Running migrations.

2026_05_12_190948_add_role_to_users_table . 81.14ms **DONE**

- Membuat custom middleware CekAdmin

```
C:\laragon\www\siak-app>php artisan make:middleware CekAdmin
```

INFO Middleware [C:\laragon\www\siak-app\app\Http\Middleware\CekAdmin.php] created successfully.

```
app > Http > Middleware > CekAdmin.php
1  <?php
2
3  namespace App\Http\Middleware;
4
5  use Closure;
6  use Illuminate\Http\Request;
7  use Symfony\Component\HttpFoundation\Response;
8
9  class CekAdmin
10 {
11     public function handle(Request $request, Closure $next): Response
12     {
13         if (!auth()->check()) {
14             return redirect()->route('login');
15         }
16
17         if (auth()->user()->role !== 'admin') {
18             return redirect()
19                 ->route('beranda')
20                 ->with('error', 'Anda tidak memiliki akses admin.');
```

- Mendaftarkan middleware CekAdmin

```

bootstrap > app.php
1  <?php
2
3  use Illuminate\Foundation\Application;
4  use Illuminate\Foundation\Configuration\Exceptions;
5  use Illuminate\Foundation\Configuration\Middleware;
6  use App\Http\Middleware\CekAdmin;
7
8  return Application::configure(basePath: dirname(__DIR__))
9      ->withRouting(
10         web: __DIR__.'/../routes/web.php',
11         commands: __DIR__.'/../routes/console.php',
12         health: '/up',
13     )
14     ->withMiddleware(function (Middleware $middleware) {
15         $middleware->alias([
16             'cekadmin' => CekAdmin::class,
17         ]);
18     })
19     ->withExceptions(function (Exceptions $exceptions) {
20         //
21     }->create());

```

- Menggunakan middleware CekAdmin pada route tertentu

```

Route::middleware(['auth', 'cekadmin'])->group(function () {
    Route::resource('produk', ProductController::class);
});

```

- Menjadikan user sebagai admin

```

C:\laragon\www\siak-app>php artisan tinker
Psy Shell v0.12.22 (PHP 8.3.30 - cli) by Justin Hileman
New PHP manual is available (latest: 3.0.5). Update with `do
c --update-manual`

> $user = App\Models\User::first();

= App\Models\User {#8558

```

```
class ProductController extends Controller
{
    public function index()
    {
        if (auth()->user()->role === 'admin') {
            $products = Product::latest()->paginate(10);
        } else {
            $products = Product::where('user_id', auth()->id())
                ->latest()
                ->paginate(10);
        }

        return view('produk.index', compact('products'));
    }
}
```

- saat role admin bisa login maka dapat mengakses produk untuk edit, hapus, dan detail

The screenshot shows a web browser at 127.0.0.1:8000/produk. The page is titled 'Dashboard' and 'intannn'. It contains a section 'Daftar Produk' with a sub-header 'Kelola produk tanaman hias Mitra Flora.' and a '+ Tambah Produk' button. Below is a table with 5 columns: Gambar, Kode Barang, Nama Produk, Kategori, Harga, Stok, Tanggal Masuk, Status, and Aksi. The table lists 5 products: Anggrek Bulan MF-001, Kaktus MF-002, Marigold MF-003, Aglonema MF-004, and Lidah Mertua MF-005. Each row has a corresponding 'Aksi' column with links for 'Detail', 'Edit', and 'Hapus'.

Gambar	Kode Barang	Nama Produk	Kategori	Harga	Stok	Tanggal Masuk	Status	Aksi
	MF-001	Anggrek Bulan	Tanaman Indoor	Rp 150.000	8	2026-01-10	Tersedia	Detail Edit Hapus
	MF-002	Kaktus	Tanaman Outdoor	Rp 50.000	3	2026-02-05	Hampir Habis	Detail Edit Hapus
	MF-003	Marigold	Tanaman Outdoor	Rp 50.000	3	2026-02-10	Hampir Habis	Detail Edit Hapus
	MF-004	Aglonema	Tanaman Indoor	Rp 80.000	20	2026-03-01	Tersedia	Detail Edit Hapus
	MF-005	Lidah Mertua	Tanaman Indoor	Rp 90.000	6	2026-03-15	Tersedia	Detail Edit Hapus

- saat role customer ingin mengakses produk (edit, hapus, detail) tidak bisa sehingga diarahkan ke beranda
