Implementasi Proyek Mitra Flora

Aktivitas Mandiri 3

1. Buat layout master: resources/views/layouts/app.blade.php dengan navbar, main content area (@yield('content')), dan footer

```
C:\laragon\www\siak-app>mkdir resources\views\layouts
```

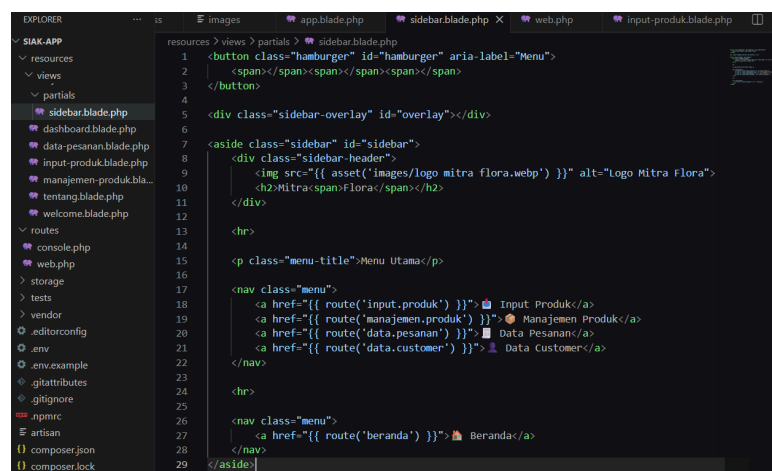

```
resources > views > layouts > app.blade.php
1 <!DOCTYPE html>
2 <html lang="id">
3 <head>
4 <meta charset="UTF-8">
5 <meta name="viewport" content="width=device-width, initial-scale=1">
6 <title>Mitra Flora</title>
7
8 <link rel="stylesheet" href="{{ asset('css/adminstyle.css') }}">
9 </head>
10 <body>
11
12 @include('partials.sidebar')
13
14 <main class="main">
15 @include('partials.navbar')
16
17 @if(session('success'))
18 <p>{{ session('success') }}</p>
19 @endif
20
21 @yield('content')
22
23 @include('partials.footer')
24 </main>
25
26 @stack('scripts')
27
28 </body>
29 </html>
```

2. Buat partial: resources/views/partials/navbar.blade.php dan sisipkan dengan @include di layout

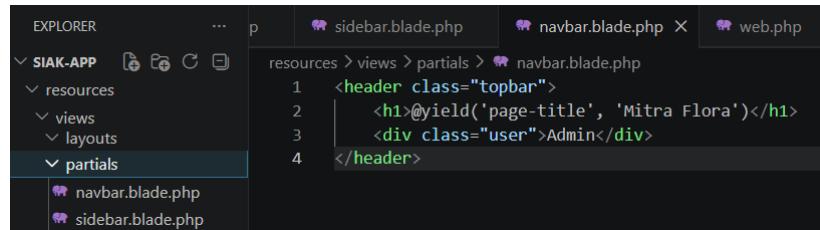

```
C:\laragon\www\siak-app>mkdir resources\views\partials
```

- a. Partial sidebar

```
resources > views > partials > sidebar.blade.php
1 <button class="hamburger" id="hamburger" aria-label="Menu">
2 <span></span><span></span><span></span><span></span>
3 </button>
4
5 <div class="sidebar-overlay" id="overlay"></div>
6
7 <aside class="sidebar" id="sidebar">
8 <div class="sidebar-header">
9 
10 <h2>Mitra Flora</h2>
11 </div>
12
13 <hr>
14 <p class="menu-title">Menu Utama</p>
15
16 <nav class="menu">
17 <a href="{{ route('input_produk') }}"> Input Produk</a>
18 <a href="{{ route('manajemen_produk') }}"> Manajemen Produk</a>
19 <a href="{{ route('data_pesanan') }}"> Data Pesanan</a>
20 <a href="{{ route('data_customer') }}"> Data Customer</a>

22
23 <hr>
24 <nav class="menu">
25 <a href="{{ route('beranda') }}"> Beranda</a>

27 </aside>
```

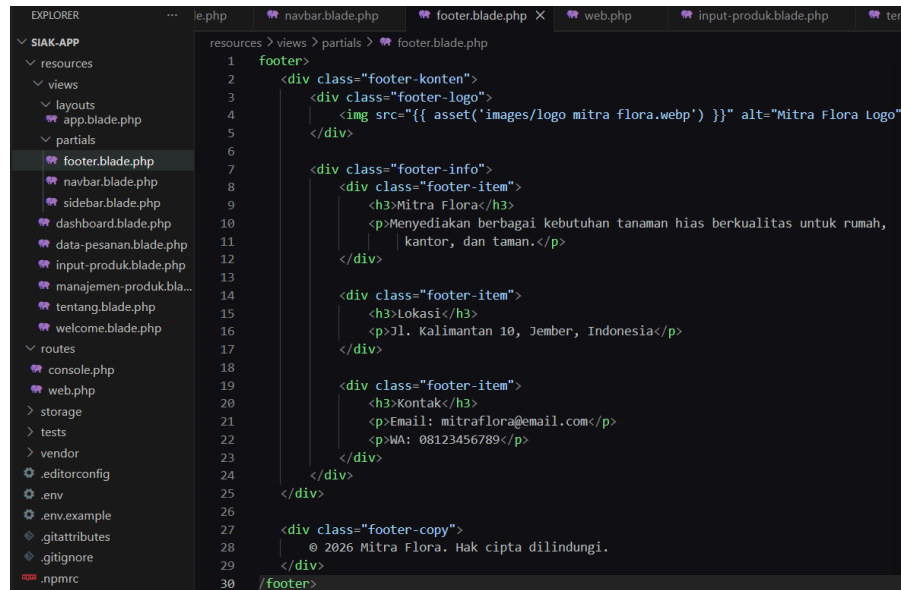

b. Partial navbar

The screenshot shows the VS Code interface with the Explorer on the left and the Editor on the right. The Explorer shows the project structure: SIAK-APP > resources > views > partials. The Editor displays the content of `navbar.blade.php` in the `resources > views > partials > navbar.blade.php` path. The code is as follows:

```
1 <header class="topbar">
2   <h1>@yield('page-title', 'Mitra Flora')</h1>
3   <div class="user">Admin</div>
4 </header>
```

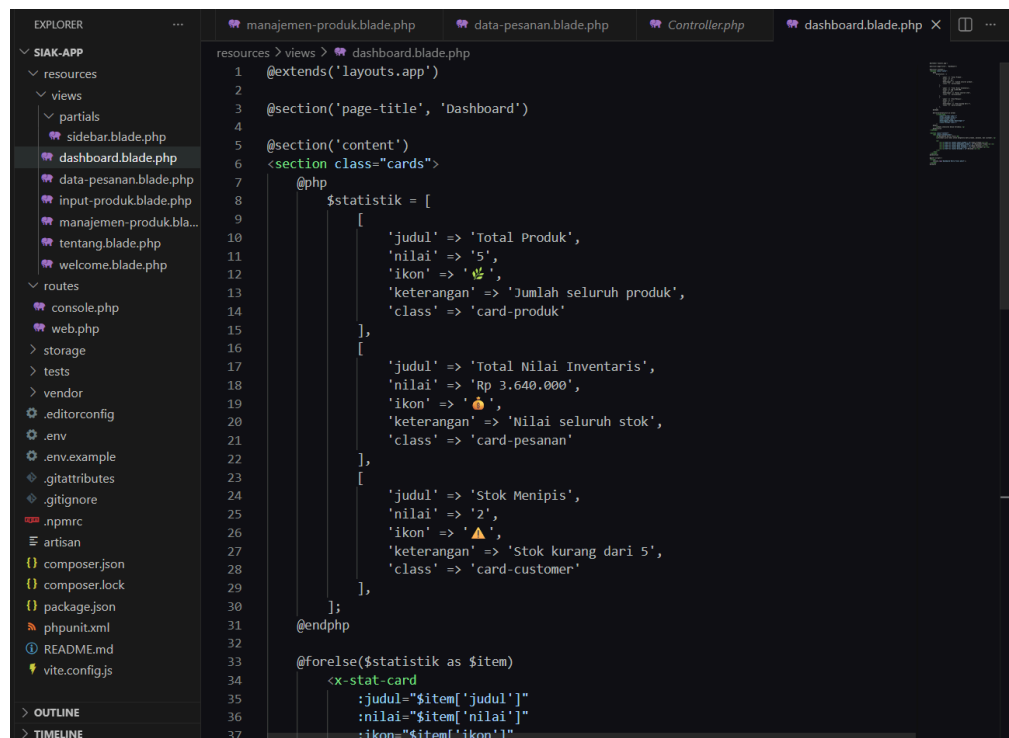

c. Partial footer

The screenshot shows the VS Code interface with the Explorer on the left and the Editor on the right. The Explorer shows the project structure: SIAK-APP > resources > views > partials. The Editor displays the content of `footer.blade.php` in the `resources > views > partials > footer.blade.php` path. The code is as follows:

```
1 footer>
2 <div class="footer-konten">
3   <div class="footer-logo">

3. Buat halaman dashboard: `resources/views/dashboard.blade.php` yang `@extends('layouts.app')`

The screenshot shows the VS Code interface with the Explorer on the left and the Editor on the right. The Explorer shows the project structure: SIAK-APP > resources > views > partials. The Editor displays the content of `dashboard.blade.php` in the `resources > views > dashboard.blade.php` path. The code is as follows:

```
